

Radiation Physics and Chemistry – Instructions to Authors

Submission of Papers

Authors are requested to submit their original manuscript and figures with two copies to one of the Editors-in-Chief:

D. A. Bradley, (*Radiation Physics*), School of Physics, University of Exeter, Stocker Road, Exeter, EX4 4QL UK;

A. Miller, (*Radiation Processing*), Radiation Research Department, Building 201, Risø National Laboratory, DK 4000, Roskilde, Denmark;

L. Wojnárovits, (*Radiation Chemistry*), Institute of Isotopes and Surface Chemistry, Chemical Research Centre, Hungarian Academy of Sciences, IISC CRC HAS, Budapest, XII, Konkolythye M. UK 29-33, HL 1525, P.O. Box 77, Hungary.

Submission of a paper implies that it has not been published previously, that it is not under consideration for publication elsewhere, and that if accepted it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the publisher. Papers must be written in English.

Types of Contribution

Manuscripts, which will be subject to peer review, should take one of the following forms:

Original Papers, which should be definitive and describe a reasonably complete investigation;

Technical Notes, which may describe new, previously unpublished information, including preliminary communications and work in progress; or may take the form of *Letters to the Editor* containing comments related to articles previously published in the journal. This type of communication should not exceed two printed pages in order to expedite its publication;

Review articles and conference proceedings may also be accepted for publication following discussion with an Editor-in Chief of the Journal;

Book Reviews by invitation from an Editor-in-Chief.

Manuscript Preparation

General: Manuscripts must be typewritten, double-spaced with wide margins on one side of white paper. Good quality printouts with a font size of 12 or 10pt are required. The corresponding author should be identified (include a fax number and e-mail address). Full postal addresses must be given for all co-authors. Authors should consult a recent issue of the journal for style if possible. An electronic copy of the paper should accompany the final version. The Editors reserve the right to adjust style to certain standards of uniformity. Authors should retain a copy of their manuscript since we cannot accept responsibility for damage or loss of papers. Original manuscripts are discarded one month after publication unless the Publisher is asked to return original material after use.

Animal Experiments: In manuscripts describing experiments with living animals, authors should state clearly in the text that the experiments were carried out in compliance with relevant national laws relating to the conduct of animal experimentation, or, where such laws do not exist, that the studies were performed in accordance with some internationally recognized code of practice such as the United Kingdom Biological Council's *Guidelines on the Use of Living Animals in Scientific Investigations*, 2nd edn.

Paper Length: Papers should have a maximum length of preferably 20–30 manuscripts pages.

Abstracts: An abstract of not more than 80 words must be supplied for all articles.

Text: Follow this order when typing manuscripts: Title, Authors, Affiliations, Abstract, Keywords, Main text, Acknowledgements, Appendix, References, Figure Captions and then Tables. Do not import the Figures or Tables into your text. The corresponding author should be identified with an asterisk and footnote. All other footnotes (except for table footnotes) should be identified with superscript Arabic numbers.

Nomenclature: Preferably, Systeme International (SI) units should be used throughout with equivalent quantities in older usage indicated in parentheses. NBS Special Publication 330 The International System of Units (SI) or the Systeme International d'Unites' may be helpful in this respect. Chemical and biological nomenclature should conform to International Union of Pure and Applied Chemistry (IUPAC) recommendations. The IUPAC Rules can be found in the Handbook of Chemistry and Physics, CRC Press Inc., Boca Raton, FL. Radioactive labels should be indicated by the radionuclide's symbol in square brackets before the labelled compound, e.g. $[3\text{H}]\text{H}_2\text{O}$, $[14\text{C}]\text{carbon dioxide}$, 2-amino-4- $([11\text{C}]\text{methylthio})\text{butyric acid}$ (not $[11\text{C}]\text{methyl-methionine}$), N- $[11\text{C}]\text{methyl-normorphine}$, etc. Carrier-free compounds only should be designated as $3\text{H}_2\text{O}$, 13NH_3 , etc. No-carrier-added compounds should be written as $[13\text{N}]\text{NH}_3$, $[11\text{C}]\text{CO}_2$ unless proof of specific activity is given. Metastable (isomeric) and ground state of nuclei are designated by an "m" or "g" respectively, placed after the atomic-mass number, e.g. 99mTc and 99gTc , although the "g" may be omitted if no ambiguity results.

References: All publications cited in the text should be presented in a list of references following the text of the manuscripts. In the text refer to the author's name (without initials) and year of publication (e.g. "Since Peterson (1993) has shown that...", or "This is in the agreement with results obtained later (Kramer, 1994)"). For three or more authors use the first author followed by "et al.", in the text. The list of references should be arranged alphabetically by authors' names. The manuscript should be carefully checked to ensure that the spelling of authors' names and dates are exactly the same in the reference list.

References should be given in the following form:

Adams, A., 1998a. Applied gamma-ray spectrometry. *Radiat. Phys. Chem.* 53 (1), 354–369.

Adams, A., 1998b. Least square fitting analysis. *Radiat. Phys. Chem.* 54 (2), 457–472.

Adams, A., Berg, B., 1997. Comparative effectiveness of gamma-rays and electron beams in food irradiation. In: Thorn, S. (Ed.), *Food Irradiation*, Elsevier Science, London, pp. 167–206.

Adams, A., Berg, B., Smith, C., Davis, G., P., Jones, K., 1992. Radiation chemistry of aqueous solutions. *Appl. Radiat. Isot.* 48 (4), 254–267.

RADIATION PHYSICS AND CHEMISTRY

Illustrations: All illustrations should be provided in camera-ready form, suitable for reproduction (which may include reduction) without retouching. Photographs, charts and diagrams are all to be referred to as "Figure(s)" and should be numbered consecutively in the order to which they are referred. They should accompany the manuscript, but should not be included within the text. All illustrations should be clearly marked on the back with the figure number and the author's name. All figures are to have a caption. Captions should be supplied on a separate sheet.

Line drawings: Good quality printouts on white paper produced in black ink are required. All lettering, graph lines and points on graphs should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal. Dye-line prints or photocopies are not suitable for reproduction. Do not use any type of shading on printouts of computer-generated illustrations.

Photographs: Original photographs must be supplied as they are to be reproduced (e.g. black and white or colour). If necessary, a scale should be marked on the photograph. Please note that photocopies of photographs are not acceptable.

Colour: Figures may be published in colour, if this is judged essential by the Editor. Where colour figures are required the author will be charged for colour printing at the current colour printing costs.

Tables: Tables should be numbered consecutively and given a suitable caption and each table typed on a separate sheet. Footnotes to tables should be typed below the table and should be referred to by superscript lowercase letters. No vertical rules should be used. Tables should not duplicate results presented elsewhere in the manuscript, (e.g. in graphs).

Electronic Submission

Authors should submit an electronic copy of their paper with the final version of the manuscript. The electronic copy should match the hardcopy exactly. Always keep a backup copy of the electronic file for reference and safety. Further details of electronic submission and formats can be obtained from <http://authors.elsevier.com> or from Author Services at Elsevier Science.

Proofs

Proofs will be sent to the author (first-named author if no corresponding author is identified on multi-authored papers) by PDF wherever possible and should be returned within 48 hours of receipt, preferably by e-mail. Corrections should be restricted to typesetting errors; any other amendments made may be charged to the author. Any queries should be answered in full. Elsevier will do everything possible to get your article corrected and published as quickly and accurately as possible. Therefore, it is important to ensure that all of your corrections are returned to us in one all-inclusive e-mail or fax. Subsequent additional corrections will not be possible, so please ensure that your first communication is complete. Should you choose to mail your corrections, please return them to: Log-in Department, Elsevier Science, Stover Court, Bampfylde Street, Exeter, Devon EX1 2AH, UK.

Offprints

Twenty-five offprints will be supplied free of charge. Additional offprints can be ordered at a specially reduced rate using the order form sent to the corresponding author after the manuscript has been accepted. Orders for reprints (produced after publication of an article) will incur a 50% surcharge.

Copyright

All authors must sign the "Transfer of Copyright" agreement before the article can be published. This transfer agreement enables Elsevier Science Ltd to protect copyrighted material for the authors, without the author relinquishing his/her proprietary rights. The copyright transfer covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature and translations. It also includes the right to adapt the article for use in conjunction with computer systems and programs, including reproduction or publication in machine-readable form and incorporation in retrieval systems. Authors are responsible for obtaining from the copyright holder permission to reproduce any material for which copyright already exists.
